The Catalogue of Gelechiidae (Lepidoptera) of the „László DIÓSZEGHY” Collection of the Székely National Museum

(Abstract)

A revision of the Gelechiidae in the „László DIÓSZEGHY” collection of the Székely National Museum, covering data on 115 species and 932 specimens. The revision replaces the data on the Gelechiidae published in the previous catalogue of the collection (CĂPUȘE & KOVÁCS, 1987).

Introduction

The Gelechiidae (Lepidoptera) in the „László DIÓSZEGHY” collection in the Székely Nemzeti Múzeum of Sepsiszentgyörgy (Sfântu Gheorghe) were revised, using the „Gelechiidae of Central Europe” (ELSNER & al., 1999), the third volume of „Microlepidoptera of Europe” (HUEMER & KARSHOLT, 1999) and „The Fauna of the European part of the USSR” (PISKUNOV, 1981). The nomenclature used was that proposed by KARSHOLT & RIEDL (1996) and POVOLNÝ (1996) as modified by ELSNER & al. (1999).

Significant differences were found between the data published in the catalogue of the collection (CĂPUȘE & KOVÁCS, 1987) and our revision. In the catalogue only 58 species and 434 specimens were mentioned whereas we in fact identified 76 species. A large number of gelechiid moths were also found in the unidentified material of the collection. Their identification brought the total of species to 115, covering 932 specimens.

To replace the data on the Gelechiidae of the former catalogue of the collection (CĂPUȘE & KOVÁCS, 1987: 57–63) we give a detailed list below.

The most interesting results have been already published (KOVÁCS & KOVÁCS, 1994, 2000). 14 species recorded are new for the Lepidoptera fauna of Romania (ELSNER & al., 1999, KARSHOLT & RIEDL, 1996, POPESCU-GORJ, 1984: 127–130, POVOLNÝ, 1996, VICOL, 1997: 192): *Caulastrocecis fufurella* (Staudinger, 1871), *Monochroa servella* (Zeller, 1839), *Monochroa elongella* (Heinemann, 1870), *Monochroa inflexella* Svensson, 1992, *Monochroa lutulentella* (Zeller, 1839), *Eulamprotes ochricapilla* (Rebel, 1903), *Eulamprotes plumbella* (Heinemann, 1870), *Bryotropha similis* (Stainton, 1854), *Filatima djakovica* Anikin & Piskunov, 1996, *Scrobipalpa (Euscrobipalpa) hyoscyamella* (Stainton, 1869), *Ephysteris (Microcraspedus) insulella* (Heinemann, 1870), *Synopacma sangiella* (Stainton, 1863), *Helcystogramma arulensis* (Rebel, 1929) and *Thiotricha subocellea* (Stephens, 1834).

Recent unpublished research by P. HUEMER showed that the Central European (including Romanian) populations of *Scrobipalpa (Euscrobipalpa) costella* (Humphreys & Westwood, 1845) were misidentified (ELSNER & al., 1999: 44, KOVÁCS & KOVÁCS, 2000: 18, 33) and they should be replaced by *Scrobipalpa (Euscrobipalpa) hyoscyamella* (Stainton, 1869) (HUEMER, pers. comm.).

Gelechiidae al colecției de
lepidoptere „László
DIÓSZEGHY” din Muzeul
Național Secuiesc
(Rezumat)**

Autorii au revizuit materialul de Gelechiidae al colecției de lepidoptere „László DIÓSZEGHY” din Muzeul Național Secuiesc. Sunt publicate datele celor 115 specii și 932 de exemplare. Datele referitoare la Gelechiidae din catalogul colecției publicate anterior (CĂPUȘE & KOVÁCS, 1987) vor fi substituie cu cele prezentate acum.

**Der Katalog der Gelechiidae
(Lepidoptera) der „László
DIÓSZEGHY” Sammlung des
Szekler Nationalmuseums
(Zusammenfassung)**

Die Revision der Gelechiidae des „László DIÓSZEGHY” Sammlungs des Szekler Nationalmuseums wurde gemacht. Die Daten von 115 Arten und 932 Exemplare sind publiziert. Die Daten der Gelechiidae aus der frühere publizierte Katalog (CĂPUȘE & KOVÁCS, 1987) mit der Überstehenden vertreten müssen.
